

## CitationDocument\_1.0.0 Rev 2 Schema Changes

Several changes have been made to CitationDocument\_1.0.0.xsd. These changes were made to ensure consistency within the document or to more accurately reflect the data accepted by MNCIS.

Throughout the schema, wherever an ORI is referenced, the word 'Identifier' was dropped from the name and the structure of the element was changed to ORI/ID, e.g., CourtJurisdictionORI/ID. Elements affected include:

- CourtJurisdictionORI
- IssuingAgencyORI
- SubmittingAgencyORI

Several elements that are used as an ID were structured as simple elements, e.g., CitationNumber. They were changed to be complex elements of structured like CitationNumber/ID. Elements affected include:

- CitationNumber/ID
- PersonID/ID (and moved it to PersonAssignedIDDetails)
- FilingInstanceIdentifier/ID (and renamed to EfileID)
- CourtJurisdictionORI/ID
- IssuingAgencyORI/ID
- SubmittingAgencyORI/ID
- OfficerBadgeNumber/ID
- PlateNumber/ID
- StatuteID/ID
- OrdinanceCategoryID/ID
- RuleID/ID
- CourtFileNumber/ID
- ChargeSequenceID/ID
- 

Several element names were changed:

- StandardName to PersonName
- SubjectEthnicity and SubjectRace to PersonEthnicity and PersonRace
- JurisdictionOfOffense to CommunityOfOffense
- IDJurisdictionText to IDJurisdiction
- PersonOtherID to PersonOtherAssignedID
- PlateStateText to PlateState

Some elements were deleted:

- PersonFullName was deleted because MNCIS does not accept it. Person names should be submitted as separate components, e.g., FirstName, MiddleName, SurName, etc.
- Deleted State Text Type because it is not being used.

Changes specific to the CitationDocumentResponseType:

- PartyKey was deleted from the ResponseDocumentType.
- Comment was added as an element under Rejected.
